

THE CALGARY CALL

VOLUME XXX No. 44

GLEICHEN, ALBERTA, WEDNESDAY JANUARY 19, 1938

SUBSCRIPTION \$2.00 PER YEAR

GUNNERS DEFEAT JENKINS FRIDAY BY SCORE OF 5-4

Friday evening's league hockey game at the arena, between Jenkins and the Gunners was rather amusing, ending with some five minutes of the last period had been played. Then things began to happen which proclaimed the Gunners' winner, by last decision counted first in period number one when B. Lester scored assisted by Wolf. Hansen scored for Calgary. Shots on Gleichen goal 6, on Jenkins 4. Three of the six shots on Gleichen were so close in that it seemed only a minute kept them out. Jacking, checking was close.

In the second Harris put Jenkins on top. The Gunners shortly after made an equalizer when B. Brown tossed in the puck unassisted. Evans for Jenkins broke the tie seconds later in an individual play. This Calgary went into the third with a one goal margin. A penalty was handed out to Jenkins. Shots on Calgary net 6 on Gleichen 5.

A few minutes after the start of the third Johnston for Calgary took a long rest from the line. He beat Wilson thereby putting the victors two goals in the lead. A few moments later scored from his line to rouse the ire of Camp Brown. That gentleman had been playing in a rather desultory fashion all evening, seeming not to care the side or loss. Anyway he came to life likewise chasing the leaguer out of the rest on the Gunners. Jenkins was then left out played and were no match to the local side. On his head did play seems that the action was over. On the Gunners, no knots to keep out four shots that came almost as fast as one could count. T. Brown got a penalty but that made no difference to the Gunner forward line they nailed the Calgary boys to their own goal. Camp followed up his scoring spree and blazed the net again this time on a pass from E. Lester. Gleichen was now a goal ahead and interest in the game by both players and spectators. Gleichen, however, did not let the victors rest and just as the first bell jangled to ring down the curtains a fight was in the making with sticks as weapons of offense but before the lads could give a display of their ability in the manly art of fist-fighting they were thrust them off to the dressing room.

Referee James and McKay. T. Gleichen, James, Newson, T. Brown, Maynard, Murray, Red and G. E. and W. E. Lester, Clifford Desjardine and Wolf.

CANADIAN LEGION WILL MEET IN CONVENTION

The Canadian Legion of the British Empire Service League will be holding its Dominion convention in Fort William this month end and continuing for five days. It is likely that the Gleichen branch will be represented. Prior to the opening of the convention, special committees have been set up to consolidate the reports of hundreds of resolutions which have been sent in.

The Dominion convention of the Legion can well be termed the "Parliament of Ex-Servicemen" as all problems affecting them are debated and recommendations made to Dominion government. At the last convention which was held in Vancouver in 1936, the question of unemployment amongst returned men was one of the principal matters.

Following the convention, a parliamentary committee was appointed. This committee consisted of returned men, who represented all parties in the House of Commons. They discussed evidence and their main recommendation was that a Veterans' Assistance Commission be appointed to travel Canada taking evidence and making records of all unemployed ex-service men and to assist towards the employment of the former members of the forces.

At the last session of parliament this commission brought in an interim report recommending numerous suggestions which would lead to

wards the placing in employment of unemployed ex-service men or to their being taken care of by the Dominion Government rather than at present being taken care of by local municipal relief. They also made recommendations which would materially have assisted Imperials now living in Canada. Their report was not acceptable to the Dominion government in whole. The government did, however, set up in principle points voluntary local committees composed of leading citizens who serve their services without charge; the government paying for office and secretarial work.

As a consequence of this, a corps of commissioners has been formed. In practically every province, in a number of ex-service men have obtained employment through this source. A scheme of probationary training was also accepted. In the case of Alberta, this has not proved of very material benefit, only five or fifteen men having seen granted this.

The Veterans' Assistance Commission is still in the process of its final report. It is too voluminous to be printed. A fact, however, does stand out in both its interim report and the final report, and that is that this commission believe that ex-service men, who served in actual theatre of war, and are now in need through no fault of their own, but owing to the government's unemployment throughout the Dominion, should be taken care of by the federal government and should be a charge upon the municipal corporations. The authorities are of the opinion that a large number are without employment because of their having enlisted when otherwise they would have been receiving training, which would have enabled them to obtain special abilities in different occupations.

The Legion at its last convention, felt that men who had reached the age of fifty or fifty-five years of age and had been unemployed for a good many years should be considered as employable and granted war veterans allowances until such time as they could obtain employment. There is no question at all but that men in "rived" would very much prefer employment at a living wage than having to accept war veterans' allowance or unemployment assistance. It, however, it is found and the evidence would point to the fact that a large number of these men are permanent unemployed, and the federal government should assume responsibility for them.

GIVES FINANCIAL STATEMENT OF XMAS. CONCERT

Editorial Call.

Will you be good enough to allow me space to make public the financial statement of the concert held at Christmas.

I would like to repeat the expressions of thanks, on behalf of the scholars and teachers, to all patrons and friends who so splendidly supported us on that occasion.

Receipts:

To sale of tickets	\$53.10
Expenditures	
Building rent, etc.	\$3.00
Hauling	1.00
Costumes and scenery	11.55
	\$15.55
Balance	\$37.55

J. F. GORRILL, Principal
TO SCOTS AND OTHERS OF GLEICHEN

(Contributed)

The minds of Scotsmen turn towards January 25th, the day that the Scotland her beloved poet and prophet, Willie Roderick if you have studied the works of Robert Burns, you must admit he was somewhat of a prophet for long before the advent of the moving pictures indeed 150 years ago Burns in one of his best known poems in which he addressed a naughty lady who is sitting in front of him in church, requests of the great power his privilege, in these words—

O' wad some pow'r wad the gittie gie us
Tae see some o'ws as likers see us
It wad frae many a blunder free us

SEASON HERE FOR ANNUAL FINANCIAL REPORTS

The years keep rolling round around, and we are again in the season of financial statements. They are now being prepared by the majority of all that has been taken in, and all that has been disbursed and for what purpose.

The financial statements indicate just how business is being conducted by the representatives, and what progress of work has been made by the community during the past year. They give an interesting picture of earnest citizenship and of municipal management.

The stockholder in private business is the owner of the day, and citizens generally are making up their minds to learn how they stand personally, where reductions may be made, where outlay has been justified, and what results, exists between receipts and expenditures. The standing of the municipality is of no less importance.

Self interest and community interest should prompt everyone to study these financial statements, as painstakingly prepared and presented. They represent in brief form, all the administration of the past year. In the back ground are many hours of deliberation on the part of councilors and secretaries, many business councils and a great amount of time expended outside of the regular meetings.

There may be facts and figures in the statements which are not clearly understood by the ratepayer. And the time and place to present questions is at annual meetings which are coming up shortly. The annual meeting should be a very important event in any community. It is there that a detailed explanation of all business is given by the councilors. Whether ratepayers attend in a spirit of criticism or in a spirit of commendation, they should at least attend. It is their duty which they owe themselves and the community which they owe their representatives.

LADIES SOCIAL CREDIT GROUP MEET HOME MR. AND MRS. G. BELL

The Meadowbrook Ladies Social Credit Group sponsored a social evening at the home of Mr. and Mrs. Geo. Bell. A very enjoyable evening was spent playing cards. First prizes were won by Mr. McKeeve and Miss Bell, while the bulky prize went to Kenny Bell and Mrs. McArthur. Friends old and new exchanged New Year's greetings and enjoyed a delicious supper served by the hostess and her daughters.

And football noise.

Now that golf has been given up, with the addition of hearing corns on his thiers hear us.

It is erroneously believed by many people that Burns was an uneducated man, this idea of course being rampant only where general ignorance of his works prevail. Robert Burns was fully acquainted and conversant with the works of William Shakespeare, and other scholarly writers of his day. I refer my readers to some of his epistles to prominent men of his day, where it will be found to satisfaction his mastery of the English language.

It is also an erroneous belief by many that Burns was an irreligious man. For a moment I would ask my readers to study the following lines from the pen of the poet.

O Thou great Being! What thou art
Surprised me to know;
Yet sure I am, that know to thee
Are all Thy works below.
Thy creature here before thee stands,
All writhed and distract;
Yet sure those hills that wring my soul
Obeys thy high behest.
Thou almost dauntless canst not act
From cruelty or wrath!

THE WORLD OF WHEAT

By H. H. L. Stange Director of "Crop Testing Plant."

We have just passed through a rather hectic wheat year. A number of unusual and striking features developed. Some of these were as follows: Western Canada experienced the lowest yield per acre ever recorded.

LIFE INSURANCE RECORDS SHOW STEADY GAINS

In reviewing the record of life insurance in Canada during the past year, Mr. G. Wilson Geddes, president of the Canadian Life Insurance Officers Association and General Manager and Actuary of the Northern Life Assurance Company, pointed out that no single subject was of such material interest to so many people as that of life insurance, in which more than one-third of the men and women of the country had their savings so safely invested.

These 3,000,000 policyholders, at the end of 1937, were protected against the two great hazards of life—premature death and penniless old age, by approximately \$6,000,000,000 of life insurance then in force in the greatest co-operative and democratic business in Canada. Behind this protection stands, as at December 31, 1937, over \$2,000,000,000 of assets, owned by the policyholders and invested for them in Dominion, provincial and municipal securities, in first mortgages on carefully selected Canadian farm properties, in public utility bonds, in school debentures, etc. In this way the savings of more than 3,000,000 thrifty citizens have served the nation's best interests by financing many a worthy public and private enterprise.

Employment in the years of economic depression.

"Every working day throughout 1937," said Mr. Geddes, "nearly a million dollars was disbursed in cash by the life insurance companies of Canada to their policyholders, and of them men and women of modest means who had thus thrifty provided for the proverbial rainy day. In fact, this daily circulation last year of the accumulated savings of our citizens in life insurance far exceeded the direct payments of all agencies throughout the Dominion."

"Despite the recession in other lines of business," continued Mr. Geddes, "more life insurance was sold in Canada in 1937 than in 1936. The increase was about 7 per cent, bringing total new insurance for the year close to the \$675,000,000 mark. Even more important than the increase in consequence harvested only half a normal crop.

The United States, after several years of drought, produced a full or normal crop.

For the first time in ten years the Canadian "carry-over" was down to the long time average of 37 million on August 1, 1937.

The premiums paid on world's markets for the top grade of Canadian wheat, because of their scarcity were higher than ever before registered.

The world's estimated demand for export wheat was the lowest recorded since 1913-14.

Wars and fear of wars greatly disturbed wheat markets, both buyers and sellers.

For the first time in three years the world produced sufficient wheat to supply its annual consumptive demands.

World's wheat carry-over is still 150 million bushels, and is usually considered sufficient.

The new Argentine wheat crop was severely damaged by frost.

All these unusual factors have had a marked influence in causing prices to rise or to decline rapidly as news of the various occurrences came forward.

Have you ever tasted
DRIED or PICKLED

If you haven't...
you are missing something

● If your favourite dealer can get you a variety of Dried or Pickled Canadian Fish, the flavor of which is as tasty and as perfect as though you had caught them yourself and promptly popped them into the pan.

They can be served in various appetizing ways: Dried Fish such as Cod, Haddock, Hake, Cusk and Pollock, and Pickled Fish such as Herring, Mackerel and Alewives can be brought to your table as new dishes... that the family will like.

Serve Canadian Fish more often. Make "Any Day A Fish Day." Your dealer can secure Dried or Pickled Fish for you no matter how far you live from a fishery... with every bit of its goodness retained for you. And, by the way... you'll find it pleasantly economical.

Air Squadron For Calgary

Formation of A Non-Permanent Force is Underway

Formation of a non-permanent squadron of the Royal Canadian Air Force in Calgary, which will be recruited in the city, is underway. It was learned from officials of military district No. 13.

It was indicated establishment of the non-permanent unit would be the first step to the stationing at Calgary of a permanent military flying force, possibly within a year.

The number of men recruited for the non-permanent squadron, aviation authorities said, would depend on the type formed in Calgary. There are three types—army co-operation, fighting or pursuit and bombing squadrons, each with varied personnel. At full strength a non-permanent squadron may have 16 officers and 140 other ranks.

Training of a non-permanent flying section would be confined largely to ground instruction in technical and theoretical training. Allocation of vacancies in schools of practical training at R.C.A.F. bases, to persons of the non-permanent unit would be likely it was reported, until aeroplanes were brought here for permanent use.

Squadron Leader F. C. Higgins from the R.C.A.F. base at Ottawa, will open an office in Calgary shortly to direct military activities in Alberta and Saskatchewan.

FLIN FLON

"The Story of Its Finding and Position To-day"

By PHATT KUHN

To Creighton and his prospecting friends also, goes the credit for the discovery, early in January, 1915, which culminated after many vicissitudes, in Manitoba's first commercial mining enterprise, when the Flin Flon mine, under the management of the Hudson Bay Mining and Smelting Co., came into production in November, 1920, as Canada's third largest metallurgical enterprise.

Prospecting had not been particularly fruitful, and while camped at the outlet of Phantom Lake, near the present site of Flin Flon, Tom Creighton, early in January, 1915, was looking for meat for his party. He saw some young willows and moccasins so started trail-ging along.

He went up the top of the hill, and when he was up the hill he discovered a lake in the distance he hadn't known was there.

Curiously led him to investigate and on the edge of the lake he discovered a spot uncovered of snow which showed a charcoal print in the schist.

He marked the spot which he could not thoroughly examine at the time, and early in the spring of 1915 he returned to the Flin Flon, and projecting through the ice at the shore, which brought the first revelation to investigate it in a characteristic, break-up occurred.

During the winter of 1915, Dan Hammel, unknown to his colleagues, came to Toronto and approached Creighton for a grubstake, forming the Mosher-Hammel Syndicate for further prospecting in the area.

Hammel, a native of Boston, Ontario, had found expression on his dynamic personality in many mining camps where he became a colorful figure, over ready to assume responsibility and carry to conclusion those jobs which offered seemingly profitable chances.

His personal personality was for him an enviable asset in the syndicate work. He had a keen sense of humor, and a ready wit. He was a man of many parts, and a man of many parts.

When Dan Mosher came back to Beaver Lake from Toronto, bringing supplies for a season's prospecting, he met Hammel and an agreement with the Mosher-Hammel Syndicate, the Flin Flon mine was born.

After the spring break-up, Creighton and Dan Mosher went in to see Creighton's discovery of the win-

ter before. Convinced that it was a large ore body, containing zinc, gold and silver, they started claims, the rights of their license, and hurried back to the syndicate at Beaver Lake to get the rest of their party and the necessary order that more claims might be made.

They Found A Book A Wolf As A Mine—Read How Well This Was Worked Out

As if a sympathetic giant had moved the mine, the discovery was already at hand. The party had picked up the remains of a party which had been on the portage on the Churchill River, where some pioneer had left a book, the "Sunset" City was the name of the mine, and the book was a book of the Flin Flon mine, under the management of the Hudson Bay Mining and Smelting Co., came into production in November, 1920, as Canada's third largest metallurgical enterprise.

In a colorful wrapper for
Christmas wrapping.

Watchful Policy Needed

In the mass of material that has already been submitted and is still being presented to the Rowell Commission on Dominion-provincial relations there is danger of some matters of considerable importance to the west being overlooked because of lack of emphasis, or at least side-tracked as comparatively insignificant when balanced against the more overwhelming issues of finance and divisions of legislative and administrative responsibility. One of these problems which is apt to get the "miss in bulk" because of the absence of the spectacular is that of assistance in the further development of the Hudson Bay route and for aid in promoting additional business for the direct north-south traffic between the Canadian west and European markets submitted at the Regina sitting of the Commission by the On-to-the-Bay Association as a section of the Saskatchewan Government brief.

A Five-Year Plan

The Association asked that consideration be given to proposals that the Federal government absorb the differential in marine insurance rates as between the Bay route and the Lake and Rail route via Montreal, to place rates between Winnipeg and Great Britain on a competitive basis, for a period of five years.

The Association also requested the Federal government to establish a modern coal handling plant at Churchill with screening facilities, weighing scales and other equipment to ensure prompt and economic discharge of incoming cargoes of Welsh anthracite coal and the installation of additional storage facilities, both at Churchill and intermediate points such as Hudson Bay Junction and the Pas to facilitate the storage and breaking of bulk of merchandise for the wholesale and retail trade in Manitoba and Saskatchewan cities.

Marine Insurance Rates

There is a good deal to be said in furtherance of these requests, much more than was contained in the brief and considerably more than space permits in this column.

In respect to the first request it should be pointed out, however, that if marine insurance rates continue to decline with the same speed that they have since the route was opened for business in 1931 by the end of a five-year period, provided the rates will be secured, the rates will by that time be down to the same level as rates prevailing for inward and outward bound consignments through the St. Lawrence. Given improved crop conditions the necessary volume of business to ensure this result should be handled through Churchill during the next five years if the requested Federal aid is forthcoming.

An Economic Proposition

Increased volume of traffic in both directions is also the objective of the requests for coal handling and storage facilities. The provision of such facilities would not only tend to make feasible inbound cargoes of Welsh coal and merchandise but would go a long way towards promoting the export of timber for pit props, for which there is a demand in British Columbia, and junk, of which there is plenty on Western Canadian farms and for which there is also a market in Great Britain.

The provision of intermediate storage sheds would undoubtedly go a long way towards popularizing the Hudson Bay route with wholesalers and retailers in the centres of the west, of the white elephant, that it will be able to combine shipments, break bulk at interior points and secure consignments in less than carload quantities at local points, provided the government is prepared to furnish such service at nominal cost for a period. It would also enable consignees to combine purchases and shipments on an economic basis.

Criticism Unwarranted

During the past few months moping at the expense of the Hudson Bay route has been indulged in by some of the Eastern press, the inference being left that the system is somewhat of a white elephant, that it will be a long time, if ever, before it can stand on its own feet and that the East has had to bear the expense of its construction and is now called upon to finance its maintenance.

It is true that the railway is not yet paying its way, but the critics failed to point out that the whole Hudson Bay association drew to the west has been suffering from the combined shock of world economic depression with crop failures superimposed as an additional handicap, with the result that comparatively little export grain has been available for outward cargoes via the H.B. route and the purchasing ability for incoming commodities has been severely curtailed.

As for the East bearing the cost of construction, this inference was badly shattered when the whole Hudson Bay association drew to the attention of the Commission that 40 per cent. of the \$25,000,000 which the project including terminal facilities has cost, was financed by the sale of Mid-Western lands collected in cash and to quote the brief, "as there is still over twenty millions unpaid on contracts, it is possible that a further substantial sum may be realized."

Live Interest Advisable

In view of the apparent apathy on the part of some Eastern interests to hamper and perhaps decide the Hudson Bay route it is important that the people of the west give closer attention to the representations which have already been made to show them up and see to it that their interest in the project is not lost sight of.

"Aspirin" Trade Mark Protected

Brings Actions to Restrict Infringement And Secure Judgment

The Bayer Company Limited having brought actions to restrain infringement of its registered trade mark "Aspirin" the Exchequer Court of Canada has given judgment against its five defendants. In each case the court has ordered that the defendants be restrained from using the trade mark "Aspirin" on preparations put out by themselves and awarded the Bayer Company costs and damages.

The defendants were marketing the infringing product under various names, including Pioneer Sales Co., Western Sales Co., Western Distributing Co., Advance Specialty Co., and Acme Specialty Company. The tablets labelled "Aspirin" were not of Bayer manufacture and were packed in small envelopes, each containing three or four tablets, and mounted on cards.

It is the intention of The Bayer Company, Limited, to take every legal method to uphold its trade mark.

"Aspirin" is the trade mark of The Bayer Company, Limited, Windsor, Ontario.

Should Advertise Wheat

Dr. Hind Advocates Fever Acres And Larger Yields To Lower Production Cost

Canada should send experts to world wheat countries, particularly Russia, "to keep up posted," Dr. E. Cora Hind of Winnipeg, told the Women's Canadian Club at Toronto, last night.

Dr. Hind, speaking after a two-year globe-trotting trip in which she visited 27 countries, declared Canada should add to the 100,000 acres of wheat which it produces, 250,000 acres with larger yields per acre and at lower costs. It should be sold at the world price.

Canada, she said, should have more and better advertising in other countries.

Deserved The Fine

A splashing motorist at Ripley, Dauphin, who drove into a pool of water at the side of the road and splashed two persons with muddy water, one of them a policeman in plain clothes, in court the motorist was fined \$10, and his license endorsed for driving without reasonable consideration for other persons using the road.

Hudson Maxim, inventor of Maxim and high explosives, was born on Feb. 3, 1853.

WATCH TEMPERATURES IN DEEP-FAT FRYING

Doughnuts belong to the colder weather season, and are popular with many people because they are considered hard to digest. They certainly are not an ideal food for children and invalids but an active person can digest doughnuts with the fat because too hot, it heats the blood.

The temperature of the fat is most important. The fat should be heated to 350 degrees Fahrenheit. If the fat is too hot, it will burn the doughnuts.

It should not be too hot, but it should be hot enough to fry the doughnuts. The temperature of the fat is most important.

The kettle for deep-fat frying should be deep and should be heavy material. An iron one is best. It should be heated to 350 degrees Fahrenheit.

It should be heated to 350 degrees Fahrenheit. The fat should be heated to 350 degrees Fahrenheit.

The fat should be heated to 350 degrees Fahrenheit. The fat should be heated to 350 degrees Fahrenheit.

APPLE FRUITERS

1 1/2 cups apples baking powder
3 tablespoons sugar
1 teaspoon salt
1 cup milk

Mix and add the dry ingredients, beat the egg and add the milk. Stir the wet ingredients into the dry ones. Add the apple which has been cut into small pieces. Drop by spoonful into the hot fat and fry like doughnuts.

Noted War-Time Aviator

Captain Morley Carter Killed In Automobile Accident In Toronto

Noted war-time aviator, 49-year-old Morley Carter, killed in an automobile accident near Barrie, Ont., was buried in Ottawa, where military and Masonic honors.

Capt. Carter enlisted in 1915 in the Royal Canadian Mounted Police for several months he was sent to France for active flying and received decorations and several times for distinguished service. He was one of our airmen sent to Italy to aid the Italians against the Germans and of the force was the only one to reach the scene.

After the war, Capt. Carter was with the Ontario air force patrolling the north and making government surveys. He was also connected with the Decca and the Canadian air forces. A year ago he came east from Saskatchewan and has been with the Ontario air force since.

A Valuable Shipment Can Be Traced Back

Priceless Manuscripts Bought From England For Book Fair

It is possible that a valuable shipment, made recently by the C.P.R. The manuscripts were brought over from England via the "Empress of Britain". The parcel included the late Sir James Barrie's last work, entitled "The Boy David," and John Drinkwater's manuscript, "Robinson of England," and C. R. Forester's "The Happy Return."

Those were the only parcels of the book fair held in Toronto and Montreal.

Macaws, when mortally wounded, frequently hook their beaks over a small limb and remain hanging in mid-air after death.

Town & District

The C. P. R. are offering bargain rates to Medicine Hat this weekend. Next weekend there will be bargain rates to Calgary.

At the present time Indian Agent G. H. Gooderham is in Ottawa on business pertaining to the Blackfoot Reserve.

Miss Bernice Krause was taken to a hospital last week Saturday for an operation for appendicitis. Latest reports she is rapidly recovering.

Mr. H. Carreck and family wish to thank their many friends for the kindness shown during Mrs. Carreck's illness.

Miss Betty Taylor, who is on the nursing staff of the Calgary General Hospital, spent all of last week visiting her parents Mr. and Mrs. E. W. Taylor.

Among others who attended this hockey game at Strathmore Saturday night were Tom, Campbell and Bob Brown. They went up to pick up some of the fine points of the game.

Mrs. M. Brown and daughter, Mrs. V. McMann with the latter's youngest child Georgina, spent the week end in Calgary while there Georgina had her tonsils removed.

Mrs. Harry Carreck has returned home after being confined to a Calgary hospital for some time. Mrs. Carreck is still very weak and it would be much appreciated if no visitors called to see her for the time being.

The Strathmore Red Wings are billed to play hockey here next Tuesday evening. This should be an interesting game and a large crowd will likely be on hand to witness it. When three two teams meet the fans can rest assured of seeing a fine brand of hockey dished up. Gleichen will play the return game on Saturday 26th January.

Jack Morton is nursing a badly sprained ankle and has been confined to the house for several days. He says he will be out in a day or two. While on horseback going across country the animal stepped into a snow filled ditch and fell on Jack's leg. Fortunately he was able to get free of the stirrups and saved himself from further damage. He is also suffering from a badly sprained wrist which he injured before he sprained his ankle. Jack has had more bones broken and other serious injuries than any man in the country.

The youth of school age in Gleichen have plenty of sport to fully occupy their minds on Saturdays. There are four hockey teams. Two for boys under 12 and two for boys under 15 and if Old Sm School is counted they have two teams of similar age. All teams play a game during the week, but on Saturday morning all swing into action. At one o'clock a number of the boys go to the curling rink and play several games among themselves for which the curling club make a small charge. The curling lads are making great progress and most of them are like veterans. Game finished they may attend the matinee picture show. So it can be seen the boys minds are kept fully occupied on Saturdays as far as amusements are concerned.

LEWIS.—In loving memory of our dear mother who passed away January 19th, 1933. Just a thought of sweet remembrance. Just a memory fond and true, Just a token of affection, And a heartache still for you.

SCOUT NEWS

Close to one and a half per cent of the world's boys of Wolf Cub and Boy Scout age are in the scout movement.

Prevention of a fire panic at a children's Christmas entertainment at a theatre in Brandon, Man., was credited by Manager D. B. Roberts to four Rover Scouts whom he had invited to be present. When the fire alarm was given the Rovers at once acted to quiet the children, and kept them from crowding the aisle, and marshalled them promptly to the exits
